(TITLE) Theme of the Work in English

student¹, advisor², First examiner³, Second examiner⁴

Summary

The summary must present the objectives of the work, methodology adopted in a way that can be easily replicated, main results and final considerations. The font is Times New Romans, size 12 and single line spacing. 100 to 250 words are recommended in a single paragraph. This summary must not contain tables, figures and avoid bibliographic citations. The word ABSTRACT must be typed in capital letters, followed by the summary text in a paragraph. Between the last line of the SUMMARY and KEYWORDS, a blank line must be placed.

Keywords: three keywords after the summary. separated from each other by 1 point. starting each one with a capital letter.

Abstract: Summary translated into English.

keywords:Keywords translated into English.

¹ UniCEUB, student.

² UniCEUB, advisor.

³ UniCEUB, first examiner.

⁴ UniCEUB, second examiner.

1 INTRODUCTION

Presents the subject covered, placing it in the context in which it is found; delimits the problem; justifies the choice of topic (relevance and contributions) and defines the objectives of the study.

The page dimensions must correspond to A4 size. The general format will use a “portrait” orientation, with the body text arranged in two columns. Configure the page with top margin = 3cm, bottom margin = 2cm, left margin = 3cm, right margin = 2cm.

The title of the work, tables and references will use fonts with different sizes.

The title of the article must be size 18, aligned with the left margin. Start the words in the title with capital letters.

A blank line, size 12, must be placed between the title and the name of the first author. A blank line, size 12, must be left between the author identifications. Between the identification of the last author and the abstract, there must be a blank line, size 12. Between keywords and the first item are 2 blank lines, size 12.

The complete article must be a minimum of 17 pages and a maximum of 20 pages.

The article must be numbered starting from the introduction.

2 BIBLIOGRAPHIC REVIEW

The Bibliographic Review is also called Literature review, Theoretical framework or Theoretical foundation. It corresponds to listing the main authors and works carried out in the proposed line of research. At least 10 authors must be cited. Technical standards must be presented in the work methodology. Pay attention to direct and indirect quotations, if direct quotations are used, if there are less than 3 lines, the text must be enclosed in quotation marks, if it is more than 3 lines, the text must be indented by 4cm on the left side of the margin, this type of citation should be avoided in this article. For indirect citation, the ideas correspond to a reproduction by the student referring to the ideas of another author, without the same

transcription. Example: Chance came out of nowhere and nothing became something and beautiful research was born (FULANO, 2019).

2.1 Titles of Subitems Related to Bibliographic Review

The numbering of all titles is left-justified in each column. All titles are left-justified by their numbering. The font is size 12.

First order titles will have all capital letters. Second and third order titles (sub section) will have the first letter capitalized and the rest lowercase. Avoid using fourth-order subsections.

2.1.1 Titles of Subitems Related to Bibliographic Review Specifically Directed to the Previous Item

The space between title and text is 1 line, size 12.

At the end of the text of each section, 2 blank lines (size 12) will be placed before the next item. For sub section, free space is 1 line only before new sub section (first or second order) or 2 lines before new section (first order).

3 WORK METHODOLOGY

This item must clearly and objectively contain all methods used in the work with a view to achieving the proposed objectives. Include standards used, tests developed, among other procedures adopted in the research. This item must be clear so that it can be replicated for continued research.

Figures and tables must be clear and inserted into the text, next to their first reference, never exceeding the margins of the page. The titles of figures and tables are inserted above the illustration and the source below. Figure 1 shows the new UniCEUB logo.

Figure 1. Title in Times New Roman, size 10.

irregularity, the same work published in the same way twice.

4 FINAL CONSIDERATIONS

The final considerations of the work are the place where the final writing of everything proposed in the specific objectives will be made. The important thing is that when mentioning the objectives there is a conclusion for each of them, thus showing that the objectives proposed in the work were achieved. If they were not achieved, the author must technically justify this discrepancy.

ATHANKS (Optional)

This section is not numbered. The body of the text has the same formatting as the previous sections.

REFERENCES

The title of References and Acknowledgments are centered on the page with only the first capitalized and bold.

This section must be presented in Times New Roman, size 10. With the exception of the first line of the reference text, the others will be indented by 5mm in relation to the left limit of the column (starting from the fourth letter of the first line).

The titles of books, dissertations, theses, magazines and event annals must appear in italics. In the case of citing material from the internet, the reference must include the institution, company, or author responsible for the information, the electronic address and the date of access.

The works cited in the text must be listed in the references in alphabetical order, in the forms shown below:

BRAZILIAN TECHNICAL STANDARDS ASSOCIATION. **ABNT NBR 6023**: Information and documentation – References – Preparation. Rio de Janeiro: ABNT, 2018.

BRAZILIAN ASSOCIATION OF TECHNICAL

All titles of figures and tables will be justified to the left, numbered in consecutive order, in Times New Roman font, size 10.

Table 1. Title in Times New Roman, size 10.

Sample	1	2 (m3)	3 (MPa)	4 (°C)
Situation A	10	1000	12,0	31
Situation B	12	200	0	43
Situation C	15	20	15,3	37

If equations and/or mathematical expressions are presented in the work, they must be centered in the section and also present an explanatory caption below referring to each item mentioned in the expression/equation.

4 PRESENTATION AND ANALYSIS OF RESULTS

The most relevant results of the work must be placed in this section. It can be separated into subitems according to the research needs. The analysis of the results must be immediately after the result and based on bibliographies already read on the subject (cited in the Bibliographic Review). This item is very important, and the results must be unprecedented, that is, completely created by the author, whose responsibility is entirely his, with the supervisor being a person who will guide the work, as well as the examining board who will evaluate the merit with for a final mention. Only works with SS mention will have the chance of publication. If the work has already been sent to a conference, the importance of the author NOT authorizing publication again is highlighted, this act constitutes an
